

## Sustainability with Soul

For us, sustainability means honoring what truly lasts. It is about creating experiences that not only delight today, but also preserve the world for tomorrow. At Ananay Hotels, we believe luxury has a deeper meaning when it protects cultural heritage, uplifts local communities, and safeguards the environment. Because true hospitality is not measured only by comfort, but by the positive legacy we leave behind.

### Our Strategic Alliances

**By choosing Ananay, your stay directly contributes to cleaner air, a thriving Amazon, and a world without waste.**

## Empowering Local Communities

True sustainability begins with people. At Ananay Hotels we proudly source 100% Peruvian products, from organic amenities to local ingredients, supporting farmers, artisans, and small producers across the country. By creating dignified jobs and opportunities for Peruvians, each guest experience becomes part of a greater story: one where luxury uplifts communities and celebrates the hands and traditions that make it possible.

## Cultural Sustainability

We believe that heritage is one of the most precious resources we can protect. Our hotels inhabit historic houses that we restore with care, preserving their soul rather than replacing them with something new. This respect for architecture and history allows each guest to experience Peru not as a backdrop, but as a living legacy. Cultural sustainability, for us, means ensuring that the beauty of the past continues to inspire the future.

## Responsible Operations

Luxury should never come at the expense of the environment. That is why we have eliminated single-use plastics, implemented responsible waste management, and designed our operations to minimize light and noise pollution. Every detail, from the silence of our gardens to the purity of the air inside our rooms, reflects our promise: to create spaces that enhance the natural balance of their surroundings while offering our guests comfort with conscience.

**Stay with Purpose. Leave a Legacy.**
